

Amendments to the Specification

The paragraph starting at page 1, line 18 and ending at line 22 has been amended as follows.

--There exist techniques for navigating in an image stored in a server, from a client terminal connected to this server. For example, the Quicktime VR technique makes it possible, amongst other things, to zoom in an image to the JPEG format. This technique is implemented in software available via the Internet ~~at the address [http://www.](http://www.apple.com/quicktime)~~
through [apple.com/quicktime](http://www.apple.com/quicktime).--

The paragraph starting at page 6, line 8 and ending at line 13 has been amended as follows.

--The server 1 comprises a memory in which an image 4 is stored. It also comprises a file 9 ~~to~~ in the SWF format, which will be detailed hereinafter. The SWF format is the so-called Flash format defined by the company Macromedia. The Flash MX software for creating content to the Flash format of this company is available via the Internet ~~at the address: <http://www.macromedia.com/software/flash/>~~ through [macromedia.com](http://www.macromedia.com).--
